Preface

This bulletin provides in one volume a complete catalogue of the major publications of the Bureau of Labor Statistics: numbered bulletins, numbered reports, and periodicals. It contains a numerical listing of all bulletins issued since their publication began in 1886; a numerical listing of reports from their first issuance in 1953; a list of current periodicals; and a subject index of bulletins and reports. Also included is a list of BLS publications which do not fall into the stated categories but which may be of interest to users of this catalogue.

The numerical listing of bulletins begins on p. 1. Publication dates are shown in parentheses and prices are given for those still in print. Annotations are provided for those bulletins which analyze major economic or labor developments, explain phases of the Bureau's statistical program or survey techniques, or present the latest data for a historical series.

Reports are listed beginning on p. 98 with their publication dates. Reports have not been annotated. Current periodicals are listed alphabetically on p. 110 with their frequency of publication and price if they are for sale. Other publications of general interest are listed on p. 111 by major BLS statistical program.

The subject index (pp. 112-184) lists all bulletins published since 1915 (Nos. 174 through 1724) and all of the reports. (Bulletin 174 contains a subject index for Bulletins 1 through 173.) Cross references are provided. Annotated bulletins are identified in the subject index by an asterisk (*).

Periodicals are not included in the subject index. Subject indexes for the *Monthly Labor Review* through 1960 are provided in Bulletins 695, 696, 1080, and 1335; indexes also are provided in the December issues of the *Review*. Semiannually, the Bureau publishes an annotated catalogue of bulletins, reports, press releases, and three periodicals (*Monthly Labor Review*, *Employment and Earnings*, and *Occupational Outlook Quarterly*).

Numbered bulletins and some numbered reports are for sale. Four BLS periodicals are for sale by the copy and by subscription: *Monthly Labor Review*, *Occupational Outlook Quarterly*, *Employment and Earnings*, and *Current Wage Developments*. Publications for sale can be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or from any of the BLS regional offices listed on the inside back cover of this bulletin. Free periodicals and reports are available at the time of publication from the Bureau and its regional offices. Bulletins, reports, and periodicals can be found at most large public libraries and at most university and college libraries.

This publication replaces BLS Bulletin 1567. It was prepared in the Office of Publications, Division of Special Publications, by Rosalie Epstein, under the direction of Tommy C. Ishee.

- 369 The Use of Cost-of-Living Figures in Wage Adjustments (1925).
Describes instances in which cost-of-living data have been used by some Federal boards and commissions, principally in the adjustments of wages, and the use of cost-of-living statistics by State and municipal agencies in the adjustment of employees' salaries. Analyzes the recognition given to cost-of-living data in the settlement of wage disputes by State and industrial arbitration boards. Reviews methods used by individual companies in computing their own cost-of-living data, or in applying available data to wage adjustments. Shows the effect of Federal cost-of-living data on the budgets adopted by State minimum-wage boards. Cites wage adjustment provisions tied to cost-of-living changes in collective bargaining agreements.

- 600 Union Scales of Wages and Hours of Labor, May 15, 1933 (1934).
Presents data on union scales of wages and hours in 72 trades in 67 important industrial cities. Between 1912 and 1933, the Bureau published results of its surveys of organized trades each year, with data back to 1907. The first such bulletin was published in 1913. Some data have appeared in the Monthly Labor Review and in serial reports, rather than in bulletin form. Data on five selected trades only were published annually, between 1933 and 1952; data on four trades only since 1953.
For annotations on union scales in these latter four selected trades, see Bulls. 1706 (local-transit), 1709 (building), 1708 (motortruck drivers and helpers), and 1707 (printing), this listing.

- 714 Report on the Work of the National Defense Mediation Board, March 19, 1941-January 12, 1942 (1942).
- Report prepared by the staff of the NDMB of the methods used and the results attained in the handling of the most difficult labor disputes in the period of active preparation for national defense. In addition to a discussion of the powers, organization, and practice of the NDMB, includes a brief report on each of the 118 cases handled, together with the full text of all recommendations. An appendix supplied by the Bureau consists of the applicable Executive orders and other decisions reached after the NDMB's work in these cases was completed. For those concerned with the collective bargaining process and the relation of government thereto, this report provides a perceptive account of the practical problems raised by the combination of mediatory and recommendatory power of a vaguely compulsory nature in a tripartite body without specific statutory authority.

Discusses the development and extent in Europe of various types of cooperatives—consumers', workers' productive and labor associations, credit associations, housing associations, agricultural associations, etc.—

and their potential role in post-World War II reconstruction.

Part I provides a comparative analysis of the cooperative movement in European countries, including the types of cooperatives, extent of development, the importance of cooperatives in the national economy, and the development of international cooperative organizations. Part II deals with the formation, growth, and activities of the cooperative movement in individual countries. It provides, in most cases, some historical background showing how the economic events of the time, as well as changes in governments and national boundaries, affected the cooperative movement and helped to speed or retard its development or alter its direction.

An analysis of selected basic factors affecting labor in Southern States. Key population, migration, and labor force characteristics and the rise of industry in the South are examined to provide a broad base for understanding the position of labor in the region. Income trends and levels, wage levels and wage differentials, and changes in consumer prices are analyzed to provide insight into the relative economic position of the Southern industrial workers and of other segments of the Southern population. Efforts by Southern workers to improve their economic position are traced in the development of the trade union and consumers' cooperative movements in the South. In addition, the study appraises the impact of the Fair Labor Standards Act on Southern industries and workers, describes the operation of the old-age and survivors insurance and unemployment insurance programs of the Social Security Act, and presents principal provisions of protective labor legislation enacted in Southern States.

- 1026 Elements of Soviet Labor Law (1951).
A significant contribution to critical analysis of the Soviet economy, relating to the period between 1920 and 1951. Through textual use of laws, decrees, and official pronouncements, this study (1) demonstrates the punitive character of Soviet labor law as it applied to the Soviet equivalent of "free" labor, and (2) describes the creation of conditions for industrial conflict through pressures on management and workers, the deterioration of the trade unions, and the collapse of collective bargaining. It also includes an account of Soviet labor policies that (1) have caused loss of freedom on the job; (2) subjected the determination of wages and hours of work to severe government restriction; (3) provided for financial responsibility of workers for damages to the employer caused by the workers; and (4) established conscript labor of youth.

Summarizes the statistics presented in individual industry productivity reports issued regularly by the Bureau of Labor Statistics. (The individual reports contain analyses of the factors causing changes in output per man-hour and unit man-hour requirements, as well as more detailed statistics and information on the methods used in computing these indexes.) In addition to current changes in productivity, historical trends covering the last decade are presented for most industries. Technical notes explaining the methods used in computing the indexes are included for each of the 35 industries and industry groups covered in this report. The report contains 95

series on output per worker and per man-hour, as well as many series on production, employment, man-hours, and labor requirements per unit of output.

Describes the development of the labor movement in terms of historical and philosophical influences. Prepared originally to provide productivity teams visiting this country with background and insight into various aspects of the American trade union movement, the study has substantial interest for others concerned with industrial relations. Covers historical background and present status of labor unions; types of unions and their interrelations; collective bargaining; new attitudes in labor-management relations; collateral activities of unions, government, and labor; and labor productivity.
- 1146 Construction During Five Decades. Historical Statistics, 1907-52 (1954).
Handbook of construction statistics through 1952, covering the complete historical span of each of the statistical series on construction developed in the U.S. Department of Labor. Data are shown from the earliest years available and, for several of the series, cover a span of 35 to 40 years. The bulletin also includes a historical summary of construction trends and a selected bibliography providing additional or current information concerning the statistical series.

Third in a series of pilot studies covering the work experience, mobility, training, and personal characteristics of workers in occupations vital in defense mobilization. The report evaluates the findings of the study in terms of their significance for manpower planning in a mobilization period. It was prepared as part of a general program of the Department of the Air Force to develop systematic methods of determining the manpower feasibility of military programs. The two preceding studies in this series relate to electronics technicians (Bull. 1150) and tool-and-die makers (Bull. 1120). For studies of the occupational mobility of scientists (chemists, biologists, and physicists with Ph. D.'s), see Bull. 1121, and of professional engineers, see Bull. 968.

A description of the similarities and differences in methods of these series and a selected bibliography for each series also are provided.
- 1169 Personnel Resources in the Social Sciences and Humanities (1954).
This report is based on information reported by approximately 25,000 social scientists and humanists in 14 fields of specialization, in response to a questionnaire survey conducted in 1952 by the American Council of Learned Societies. The report presents detailed information on specialization, age, and educational backgrounds of the respondents in each major social science and humanistic field as well as the specialties in which they were employed, the functions they were performing, and the types of employing organizations. Whenever possible, separate data are given for graduate students and women. Salaries and supplementary professional income of the respondents employed full time also are discussed.
- 1170 Structure of the Residential Building Industry in 1949 (1954).
Presents and interprets the final and complete results from a nationwide study of the organization and scale of residential builders' operations. In the absence of precise statistics, the report analyzes the direction of organizational changes in the residential building industry since 1949, on the basis of an interpretation of historical developments.

Presents retail prices for approximately 150 commodities and services in certain major expenditure categories for the 20 largest cities surveyed regularly by the Bureau of Labor Statistics for the Consumer Price Index. These data, covering the last quarter 1954 through 1955, include important items in all major index groups except food and fuels, which are published separately, and rents and certain homeownership costs, which involve unique problems. The first bulletin to present average retail prices for items other than foods and fuels was published in 1955 as Bull. 1182. For a listing of BLS retail price bulletins, by item, see Subject Index under Prices, retail. For current indexes on items covered in these bulletins other than food, see the Monthly Labor Review and other BLS publications.

- 1211 Consumer Cooperatives (1957).
Last in a series of reports on developments affecting the various types of consumer cooperatives in the United States, including credit union, housing, farm supply, medical-care, student insurance, electricity, telephone, and retail- and wholesale-trade cooperatives. These reports include summaries of developments in Federal and State legislation, court decisions, and the functions of the Cooperative League of the U.S.A. in sponsoring educational and recreational activities. Some bulletins in this series review international developments and the relationship between cooperatives and labor, farm, government agencies, and other groups. Earlier bulletins in this series (703, 738, 768, 821, 859, 904, 932, 964, 1013, 1030, 1073, and 1158) contain similar information on developments. See also Bulls. 1024 and 1049 this listing.
- 1212 New England Labor and Labor Problems (1957).
Contains articles on labor and industrial relations and general economic area and industry problems in New England.
- 1213 Employment and Economic Status of Older Men and Women (1957).
Replaces Bull. 1092.
Provides historical data from a wide variety of authoritative sources on population and labor force trends, work-life expectancy, income, retirement, pension programs, and job experience of older workers. Data are presented separately for men and women, wherever possible, in order to reveal significant similarities and differences in their economic status and employment experience.

- 1221 Analysis of Health and Insurance Plans Under Collective Bargaining, Late 1955 (1957).

- Presents detailed statistics on the provisions of 300 selected health and insurance plans under collective bargaining. Types of benefits included life insurance, accidental death and dismemberment, accident and sickness (excluding sick leave, State workmen's compensation, and temporary disability payments), and hospital, surgical, and medical care. Special benefits, such as those provided for poliomyelitis and accidental injury, and during extended periods of illness, are treated separately, as are provisions applying to maternity cases.

- 1223 Comparative Job Performance by Age: Large Plants in the Men's Footwear and Household Furniture Industries (1957).
This bulletin continues earlier work on the relationship between age and work performance (Bull. 1203), and compares actual on-the-job performance of older production workers with the performance of younger workers. The extensive data provided enable the reader to draw more definitive conclusions than were possible from the pilot study. This later study is focused on the measure of the relationship between age and the three aspects of job performance: output per man-hour, attendance, and continuity of service. (See also annotation for Bull. 1273 this listing.)

- 1225 A Guide to Labor-Management Relations in the United States (1958).
Designed primarily for use by visiting trade unionists and management representatives of other countries, the study provides brief descriptions and explanations of various facets of union activity and labor-management relations. Includes 31 reports divided into (1) trade union activities; (2) collective bargaining; (3) labor-management relations in selected industries; and (4) general. The Guide is prepared in loose-leaf form and additional reports will be issued from time to time. See also Bulls. 1225-1 and 1225-2.
- 1 A Guide to Labor-Management Relations in the United States. Supp. 1 (1959).
Supplements the information in Bull. 1225. Includes a brief report on trade union activities, three reports on collective bargaining, and a bibliography.
 - 2 A Guide to Labor-Management Relations in the United States. Supp. 2 (1959).
A second supplement to Bull. 1225, containing three brief reports which pertain, respectively, to trade union activities, collec-

- tive bargaining, and labor-management relations in selected industries. Provides a glossary of industrial relations terms and a bibliography.

- 1231 New Housing and Its Materials, 1940-56 (1958).
Presents data on selected characteristics of 1-family houses authorized by building permit in 1954-56, in cities of 25,000 population and over and, in lesser detail, data on characteristics of 2- to 4-family and 5-or-more-family structures. The introductory analysis of trends during 1954-56 includes comparisons with 1940 and 1950 data from the Federal Housing Administration regarding new 1-family housing processed by the FHA for mortgage insurance under the National Housing Act. These trend data cover the general plan and size of houses; walls, floors, roofing, insulation, and rain-carrying equipment; windows, screens, and storm windows; heating facilities and fuel; electrical services; and kitchen, laundry, and other equipment. Among other comparisons, the data are distributed by selling-price class, region, and metropolitan or nonmetropolitan area.
- 1232 Digest of One Hundred Selected Pension Plans Under Collective Bargaining, Winter 1957-58 (1958).
Revised by Bull. 1307.
- 1233 Paid Vacation Provisions in Major Union Contracts, 1957 (1958).
Represents a comprehensive study of paid vacation practices under collective bargaining. Provides a detailed analysis of the prevalence and types of vacation plans, length of vacation, service and work requirements, vacation patterns, and vacation pay. The analysis also covers various administrative aspects of vacation plans; for example, pay in lieu of time off, scheduling of vacations, and vacation rights for military service personnel or upon termination of employment.

Revision of Bull. 1180.
- 1237 Injuries and Accident Causes in the Boiler-shop-Products Industry (1958).
Part of a series of work injury and accident statistics bulletins. Annual bulletins present summary statistics on disabling work injuries for each of the major industries in the United States. Other bulletins present detailed breakdowns of injuries and accident causes in selected industries, occupations, or activities during specified periods of time. Sufficient information is collected to make estimates of the number of work injuries occurring each year, the resulting total economic loss expressed in man-days of work, and the varying degrees of hazards existing in specific industries. The general purpose of these surveys is use in accident prevention work. For some years, statistics were published in other than bulletin form; for example, in the Monthly Labor Review and serial reprints, and recently as reports. See under Accidents in Subject Index.
- 1238 The Earnings and Employment of Seamen on U.S. Flag Ships (1958).
A report prepared at the request of and in cooperation with the Federal Maritime Board and the Maritime Administration, U.S. Department of Commerce. It analyzes the employment experience, daily and annual earnings, and fringe benefits of seamen on U.S. flag ships. Included are brief summaries on the operations of the American Merchant Marine and on the history of collective bargaining in the maritime industry.
- 1239 Union Constitution Provisions: Election and

Tenure of National and International Union Officers, 1958 (1958).

Analyzes the rules in union constitutions which govern the qualifications, election, and terms of union officers, and those providing for the remuneration and the removal of union presidents. The bulletin is basically a summary of the union rules effective in 1958, and does not include any analysis of union practices. Rules governing the election of AFL-CIO officers are summarized in the appendix.

1241 Automation and Employment Opportunities for Officeworkers (1958).

Designed primarily for use in vocational guidance, discusses the development and use of electronic computers and their effect on the employment of clerical workers. Provides a description of programing and outlines the qualifications and employment prospects for programers.

1242 Population and Labor Force Projections for the United States, 1960 to 1975 (1959).

Briefly reviews population growth in the United States from 1900 to 1955 and analyzes some effects of population change. Includes population and labor force projections to 1975, and a description of the methods used in preparing the projections. Points up the increasing labor force participation of women and the trend toward more part-time employment.

1243 Trends in Building Permit Activity (1959).

Presents monthly building permit statistics for 1954-56 on a national basis and annual figures from 1949-58 for cities of 100,000 population and over. Includes selected tabulations on metropolitan-nonmetropolitan and central city-suburban building during 1957-58. Describes the characteristics and limitations of the data, and explains the shift from the "old series" on "urban building authorized" (1920-June 1954) to the "new series" on "building permit activity" (January 1954-1958). A selected reference list is appended. See also Bull. 545 this listing.

- 1248 Paid Holiday Provisions in Major Union Contracts, 1958 (1959).
- 1249 Trends in Output per Man-Hour in the Private Economy, 1909-1958 (1960).
Presents indexes and average rates of change in output per man-hour in the private economy for the post-World War II period, 1947-58, and for the long-term period, 1909-58. Discusses the factors affecting the long-term increase in output per man-hour, such as technological innovation, capital investment, the role of Federal, State, and local government investment in services and facilities, and the skillful use of human resources. Summarizes the major elements in deriving the estimates of real product and man-hours, and compares the Bureau's man-hour measures in the total private economy with those of the Bureau of the Census. Includes discussions of the problems of comparing real product and man-hour estimates, and of the limitations and qualifications of output per man-hour measures. An appendix includes a detailed discussion of the methods and sources used in estimating output per man-hour.
- 1250 Health and Insurance Plans Under Collective Bargaining. Accident and Sickness Benefits, Fall 1958 (1959).
Analyzes the key features of accident and sickness benefits and the extent of the provisions for such benefits in 300 selected plans under collective bargaining in the fall of 1958. This is the first in a series of bulletins dealing separately with specific health and insurance benefits. A section on maternity benefits is included.

- 1259 Pension Plans Under Collective Bargaining.
Pt. I. Vesting Provisions and Requirements for Early Retirement;
Pt. II. Involuntary Retirement Provisions, Late 1958 (1959).
Analyzes provisions concerning vesting, benefits, and eligibility contained in selected pension plans under collective bargaining. This bulletin, which deals with 300 plans in late 1958, is the first in a new series of pension plan studies; it does not include information on disability retirement provisions. Bull. 1147 contains similar information on 300 plans in the fall of 1952. See also annotations for Bulls. 1284 and 1334 this listing.
- 1260 Nonfarm Housing Starts, 1889-1958 (1959).
Presents estimates of new permanent nonfarm dwelling units started during 1889-1958. Includes distributions from 1920 by type of structure (1-family, etc.), ownership (private, public), and location (urban, rural nonfarm); by years from 1920; and by months from 1939 or 1940. Presents data for 20 selected States in 1954-58, by ownership.

This bulletin, which also includes an analysis of the historical series and selected references, represents a final report of the work done by the Division of Construction Statistics of the U.S. Department of Labor, Bureau of Labor Statistics, in the development of the nonfarm housing starts series. See also annotations for Bulls. 915 and 941 this listing.

- 1261 Labor Supply and Mobility in a Newly Industrialized Area (1960).

Provides information on the character of the labor supply attracted to manufacturing employment in the chronically depressed rural area of Ravenswood, W. Va., near which the Kaiser Aluminum and Chemical Corp. established a mill. Analyzes work histories of employees of the mill and a small sample of unaccepted applicants; their geographical and occupational mobility; their age, sex, marital status, and education. The study examines the standards for employment established by the company and points out that only by employing persons who lived considerable distances from the plant, and by transferring professional employees from other plants, was the company able to meet those standards.

- 1262 Military Manpower Requirements and Supply, 1959-63 (1959).

Analyzes military manpower requirements and supply in the United States from the standpoint of the military manpower situation and the size and characteristics (age and sources of supply) of the military manpower pool. Indicates underlying assumptions and guiding principles. Bull. 1262 provides estimates for 1958 through 1963, and an earlier bulletin (1161) provides estimates for 1954 through 1960.

- 1263 Union Constitution Provisions: Trusteeship (1959).

Analyzes the formal rules stipulated in union constitutions governing the establishment of trusteeships, the grounds for such action, hearing requirements, the status of the local unions and their officers during trusteeship, and the provisions applying to termination and appeal. The bulletin does not extend to union practices, and is essentially a summary of union laws in effect before enactment of the Labor-Management Re-

porting and Disclosure Act of 1959. The section in this act covering trusteeships is reproduced in appendix B.

- 1275 Factory Workers' Earnings in Selected Manufacturing Industries, June 1959 (1960).
This study was part of a broad program initiated by the U.S. Department of Labor to study the economic effects of the \$1 Federal minimum wage. Bull. 1275 analyzes the manufacturing wage structure, in June 1959, on the basis of a 17-industry survey of the straight-time hourly earnings (exclusive of premium pay for overtime and work on weekends, holidays, and late shifts) of factory workers in the United States. Levels and distributions of wages of production and related workers are set forth, by selected industries, for the United States as a whole, major regions, and metropolitan and non-metropolitan areas. Changes between April 1954 and June 1959 are summarized.
For earlier studies of factory workers' earnings in relation to minimum wage legislation, see Bulls. 1179 and 1252.

- 1325 Digest of Profit-Sharing, Savings, and Stock Purchase Plans, Winter 1961-62 (20 Selected Plans) (1962).

In response to inquiries received from individuals and organizations at home and abroad, this bulletin describes the principal features of 20 selected profit-sharing, savings, and stock purchase plans in effect in the United States in the winter of 1961-62. Not presented as typical or model plans, or as a representative sample. Most of the plans are well known, although others were selected because they represent different ways of providing benefits to workers. Covers production and related workers or nonsupervisory workers; some also cover salaried and supervisory employees.

- 1326 Multiemployer Pension Plans Under Collective Bargaining, Spring 1960 (1962).
The Bureau of Labor Statistics, in cooperation with the Bureau of Labor Standards, undertook this comprehensive study of the characteristics, types of benefits, and administrative features of multiemployer pension plans under collective bargaining. Practically all such plans covering more than 25 workers and in effect in spring 1960 are taken into account.

Describes the private pension structure—prevalence of plans, types of plans, and types and characteristics of benefits provided, as well as implications for labor mobility inherent in the provisions and practices thus accounted for. The study concentrates on the vesting and early retirement provisions of pension plans. The pension credit portability provided by multiemployer plans and, to a limited extent, the age and service requirements for normal retirement are discussed. This bulletin is a part of a series undertaken, under the Manpower Development and Training Act of 1962, to "establish a program of factual studies of practices of employers and unions which tend to impede the mobility of workers or which facilitate mobility." - A comprehensive series of studies surveying the entire scope of the collective bargaining agreement. Emphasis is placed on prevalent practices, specific problems handled by negotiators, and interrelationships of agreement provisions. Quoted agreement clauses are identified by the company and union signatories and by the date of agreement expiration. The studies are based on virtually all agreements in the United States covering 1,000 workers or more, exclusive of railroad, airline, and government agreements.

Latest in a series of bulletins based on the Bureau of Labor Statistics program of surveys on the magnitude of employer expenditures for supplementary employee remuneration practices. The program provides for surveys in manufacturing industries every 3 years and in selected nonmanufacturing industries in the intervening 2 years. This bulletin contains a section on composition of payroll hours. For related data on the meat-packing and processing industry, see Bull. 1413. For related data on selected nonmanufacturing industries (mining, and finance, insurance, and real estate), see Bulls. 1332 and 1419.

Presents a detailed picture of the early results of bargaining in the Federal service, as reflected in written agreements. Though it may soon have historical significance only, it will serve as a base upon which changes in collective bargaining can be measured. The scope of bargaining with individual agencies is not as wide as in private industry, since the major terms of compensation and supplementary benefits for Federal workers are established by Congress.

- 1536 Projections 1970: Interindustry Relationships, Potential Demand, Employment (1966).
Presents 1970 projections of potential demand, interindustry relationships, and em-

- ployment under alternative assumptions regarding rates and patterns of growth. Includes a comprehensive study of the framework for the projections. Potential output in 1970 is projected and distributed among categories of final demand. Final demand is shown in a detailed "bill of goods." The interindustry employment table is used to convert the projections of final demand for goods and services into estimates of industry employment requirements. The projections contained in this bulletin are not forecasts, but provide detailed and consistent projections of what the economy may look like in 1970. See also Bull. 1673 this listing.

- 1 City Worker's Family Budget for a Moderate Living Standard, Autumn 1966 (1967).
Presents living costs for a family of four persons: an employed husband, age 38; a wife not employed; and two children, a girl age 8 and a boy 13. The level of living is described as moderate; it provides for maintenance of health and social well-being, the nurture of children, and participation in community activities.
 - 2 Revised Equivalence Scale: For Estimating Equivalent Incomes or Budget Costs, by Family Type (1968).
Family equivalence scales are measures to determine the relative income required by families differing in composition to maintain equivalent levels of consumption. The scales in this bulletin may be applied to the base, or moderate, level described for a family of four in Bull. 1570-1.
 - 3 City Worker's Family Budget: Pricing, Procedures, Specifications, and Average Prices, Autumn 1966 (1968).
 - 4 Retired Couple's Budget for a Moderate Living Standard, Autumn 1966 (1968).
The cost estimates in this study are for an urban family of two persons: a husband age 65 or over and his wife. They are assumed to be self-supporting and living independently. The budget specifies that both husband and wife are in reasonably good health and able to take care of themselves, and that each is covered by hospital and medical insurance under the Federal medicare program. Two-thirds of the families are homeowners, living in mortgage-free houses.
 - 5 Three Standards of Living for an Urban Family of Four Persons, Spring 1967 (1969).
Presents moderate, lower, and higher budgets for the family of four persons specified in Bull. 1570-1. The lower budget specifies a lower proportion of homeownership and the higher budget a greater percentage of homeownership than the moderate budget.
 - 6 Three Budgets for a Retired Couple in Urban Areas of the United States, 1967-68 (1970); Supp., 1969-70 (1971).
Presents budgets for lower, intermediate, and higher levels of consumption for the retired couple described in Bull. 1570-4.

Presents 54 charts, with brief accompanying text and tables, containing information about the progress and problems of black

Americans in recent years. Subjects covered include migration and population; employment and unemployment; income; health, education, housing; and crime. Trends in labor force participation and educational attainment are projected to 1980.

- 1700 Occupational Outlook Handbook, 1972-73 edition (1972). \$6.25.

This edition of the *Handbook* assesses the employment outlook for 10 years in the future for more than 800 occupations and 30 major industries. It is designed for use in vocational guidance and educational and economic planning. Occupations covered include professional, managerial, and technical; clerical, sales, and service; skilled trades; and semiskilled and unskilled jobs. Each occupational report describes the nature of the work; principal employers; education, training, and other qualifications required for entry; earnings, working conditions, and advancement opportunities; and sources of further information. The *Handbook* also evaluates the effects of automation, technology, and recent economic developments on the occupational and industrial manpower requirements in the decade ahead. The first chapter, Looking Ahead to a Career, provides data on trends in population, the labor force, and employment to 1980, as well as an analysis of factors affecting growth in the broad industrial and occupational groups.

(Reprints of individual occupations and industries covered are available in the Occupational Outlook Reprint Series as Bulls. 1700-1 to 1700-141.)

- 1705 Handbook of Labor Statistics 1971 (1971). \$3.25.

Collects in one volume major BLS historical series from the beginning of the series to the past year. Monthly data are shown for the last 2 years. Data also include series from other offices of the Department of La-

bor, other Departments of the government, and foreign governments. Short statements of methods used and limitations of each series of tables are included.

- 1706 Union Wages and Hours: Local-Transit Operating Employees, July 1, 1970 (1971). 25¢.

Latest in a series of bulletins presenting union wages and hours of operating employees in the local-transit industry. This bulletin presents the results of an annual Bureau survey and is based on union scales in effect on July 1, 1970. The first bulletin in this series was printed in 1922 and presented wage scales as of May 15, 1921. Surveys have been made for all ensuing years, but from 1932 to 1940, inclusive, the results were printed in the *Monthly Labor Review* and serial reprints, rather than in bulletin form. Hours of work were not included in some of the earlier bulletins because of their irregularity. The BLS first surveyed collectively bargained insurance and pension plans in 1954, and the results for the local-transit industry were first published in Bull. 1177. See also annotation for Bull. 600 this listing.

- 1707 Union Wages and Hours: Printing Industry, July 1, 1970 (1971). 65¢.

Latest in a series of bulletins presenting wages and hours in the printing industry. In this bulletin, information is based on union scales in effect on July 1, 1970. The first bulletin in this series was published in 1913 and presents wage and hour data back to 1907. The Bureau first surveyed collectively bargained insurance and pension plans in 1954, and the results for the printing industry were first published in Bull. 1176. See also annotation for Bull. 600, this listing.

- 1708 Union Wages and Hours: Local Truckdrivers and Helpers, July 1, 1970 (1971). 50¢.

Latest in a series of bulletins presenting union wage scales for motortruck drivers and helpers. This bulletin presents information based on union scales in effect on July 1, 1970, and covers approximately 320,000 drivers and 35,000 helpers in 68 cities of 100,000 inhabitants or more. The first bulletin in this series was published in 1915 and presented union wage scales in effect as of 1913 and

1914; however, the majority of quotations for the early years are for teamsters rather than for motortruck drivers. Data have been published in bulletin form for most of the ensuing years. The Bureau first surveyed collectively bargained insurance and pension plans in 1954, and the results for motortruck drivers and helpers were first published in Bull. 1178. See also annotation for Bull. 600, this listing.

- 1709 Union Wages and Hours: Building Trades, July 1, 1970 (1971). 55¢.

Latest in a series of bulletins presenting union wages in effect for building trades workers. The first bulletin in this series was published in 1913 and presents wage and hour data back to 1907. Data have been published for most ensuing years. The Bureau first surveyed collectively bargained insurance and pension plans in 1954, and the results for the building trades were first published in Bull. 1175. See also annotation for Bull. 600, this listing.

- 1710 Productivity and the Economy (1971). 50¢.

This chartbook describes how productivity changes are related to incomes, costs, prices, and employment. It traces productivity trends in the period 1950-70 for the total private economy, major sectors, and selected industries; compares trends in the United States with those in other countries; and presents projections of productivity changes in the United States to 1980.

- 1711 BLS Handbook of Methods (1971). \$2.

Contains a statement about the creation and purpose of each major data collection program carried out by the Bureau of Labor Statistics. The statements describe how data are put into final form, tell how the results may be used, and state the limitations to be remembered when one is using the data.
